

Tuesday 23rd February

LO To know the features of instructions

Instructions give information about how to complete a task. Have a look at instructions for how the shaman made his cure for Kamanya's fever.

First have a look for these features.

title	
introduction that tells you what the instructions are going to be about	
you will need	
what to do	
numbers	
capital letters	
full stops	

When you have done that there are some other features to look out for.

Did you notice any **sequencing words**? They tell us the order to do things to complete the instructions.

The equipment list uses **adjectives** to give more details.

We know that **verbs** are doing or being words. In instructions they are called **imperative verbs** because they are bossy. They are precise, we want people to do what we say.

Now see if you can find these features in the instructions.

examples of sequencing words	
examples of adjectives	
examples of verbs	

Challenge

Write your own instruction sentence.
